

ENTERPRISE HEALTHCARE TECHNOLOGY

Hospital Digital Services Platform

Transforming Patient Experience Through Intelligent Digital Healthcare Solutions

Smart Token Management | Digital CMS & Patient Displays | Patient Feedback Management

● ONE PLATFORM. THREE INTELLIGENT MODULES.

Built for Hospitals That Refuse to Compromise

ZoeConnect unifies patient queuing, digital signage, and feedback management into a single modular platform - deployed without disrupting the systems your hospital already relies on.

TRUSTED CAPABILITIES ACROSS THE HOSPITAL

- | | | |
|--|--|---|
| OK No disruption to existing HIS workflows | OK Modular, phase-wise implementation | OK Enterprise-grade security & role-based access |
| OK Scalable across single or multi-branch hospitals | OK Cloud, on-premise or hybrid ready | OK Future-proof, continuously expandable |

A Modular Digital Backbone For Your Hospital

ZoeConnect is a modular hospital digital platform designed to work alongside your existing Hospital Information System (HIS) - not replace it. Each module solves a specific operational challenge, from patient queuing to digital signage to feedback management, and can be deployed independently or as a fully integrated suite.

Hospitals grow. Departments change. Patient expectations rise every year. ZoeConnect is engineered as an evolving platform, so today's investment keeps paying off for years to come - secure, enterprise-ready, and built for the long term.

THE ZoeConnect PLATFORM STACK

HIS / Hospital Information System

ZoeConnect Integration & Security Layer

Smart Token Management

Digital CMS & Patient Displays

Patient Feedback Management

Enterprise-Ready. Secure. Built To Last.

Zero Disruption

Integrates with your existing HIS and workflows - no rip-and-replace, no retraining shock.

Modular Rollout

Deploy one module or all three. Expand at your own pace, department by department.

Scalable Architecture

From a single OPD to multi-branch hospital chains, the same platform scales with you.

Enterprise Security

Role-based access, audit trails, and secure authentication across every module.

Cloud or On-Premise

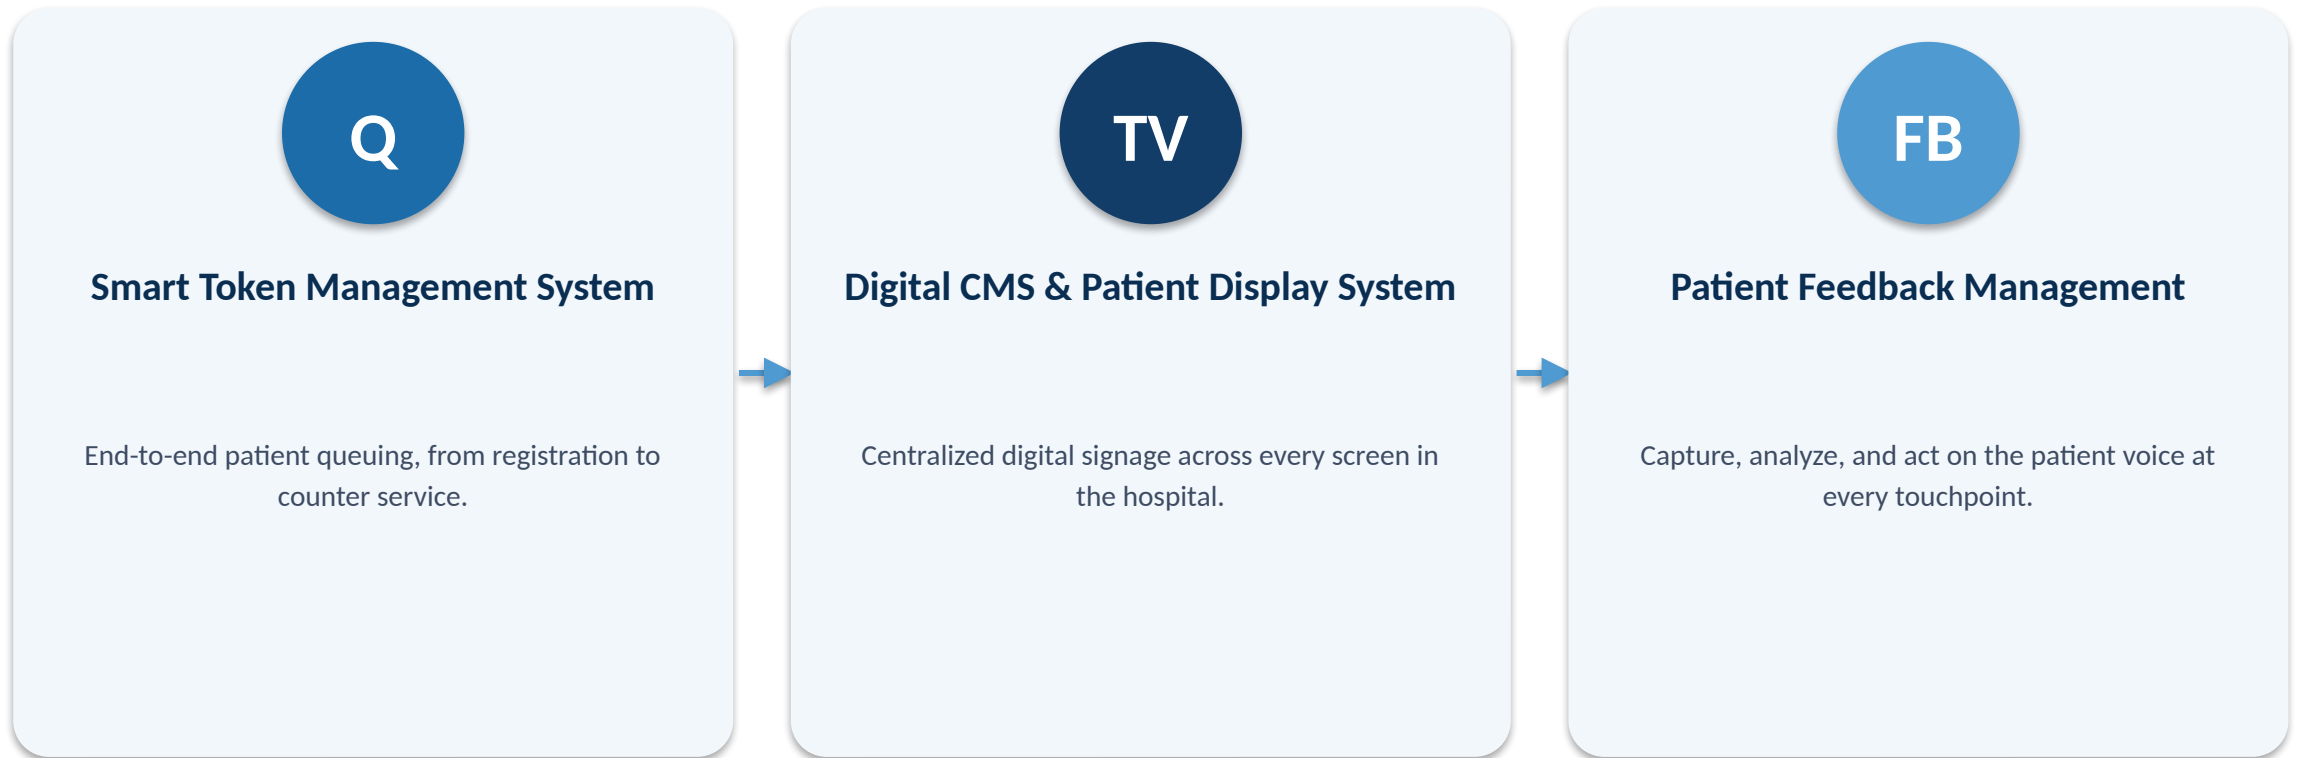

Choose the deployment model that matches your IT policy and compliance needs.

Future-Proof

A growing library of modules ready to activate as your digital strategy matures.

Three Modules. One Connected Patient Journey.

Deploy independently, or connect all three for a fully unified digital patient experience across your hospital.

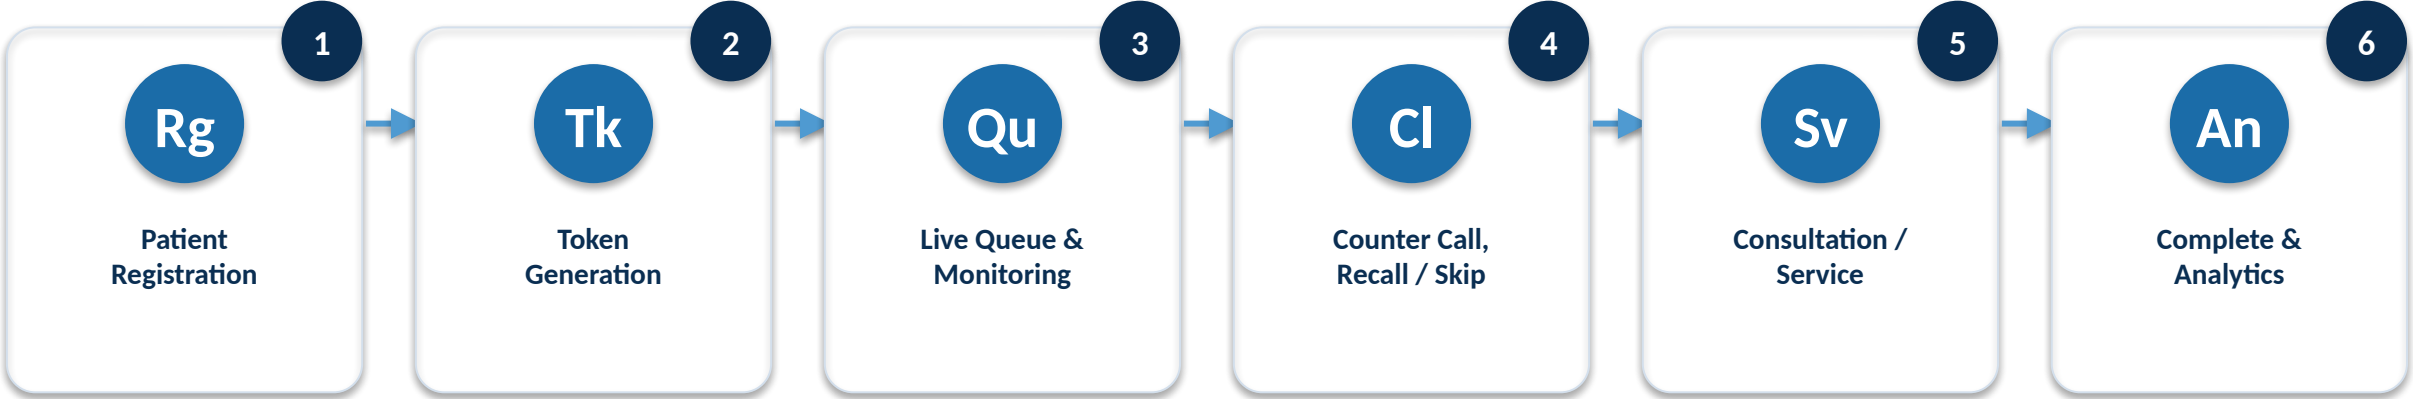

Smart Token Management System

A complete, intelligent patient-queuing engine that replaces paper tokens and manual calling with a live, auditable digital workflow.

- Department-wise & doctor-wise token queues
- Priority and emergency queue handling
- Real-time reception & counter dashboards
- Deep analytics on waiting time and service efficiency

The Complete Patient Journey, Digitized

SUPPORTED PATIENT ENTRY POINTS

Every Token, Perfectly Organized

Rg

Patient Registration

Fast front-desk or self-service registration feeding directly into the queue engine.

Qu

Queue Creation

Configurable queues per department, service, or doctor in minutes.

Dp

Department-wise Tokens

Separate token series for OPD, IPD, diagnostics, pharmacy and more.

Dr

Doctor-wise Tokens

Patients queue against their specific doctor, not just a department.

Pr

Priority Tokens

Senior citizens, differently-abled and pre-approved priority patients served first.

Em

Emergency Queue

A dedicated, always-on-top queue for critical and emergency cases.

Wk

Walk-in Patients

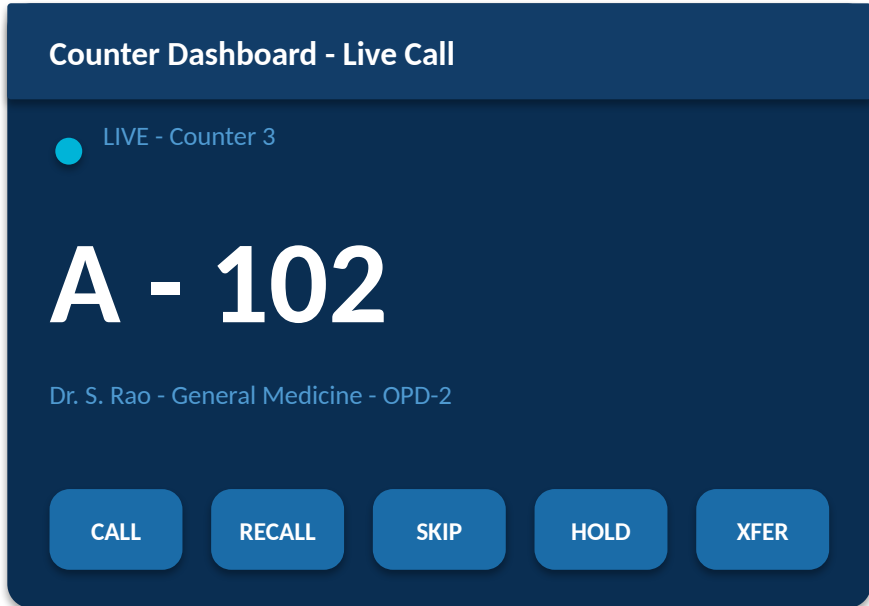

Instant token issuance for walk-ins alongside scheduled appointments.

Ap

Appointments

Appointment-linked tokens keep scheduled and walk-in flows perfectly balanced.

Reception & Counter, Working In Sync

Live Queue & Monitoring

Real-time visibility of every waiting patient across all counters.

Reception Dashboard

Front-desk view to register, assign, and track patients hospital-wide.

Counter Dashboard

Doctor / counter-side controls for calling, serving and transferring tokens.

Full Token Actions

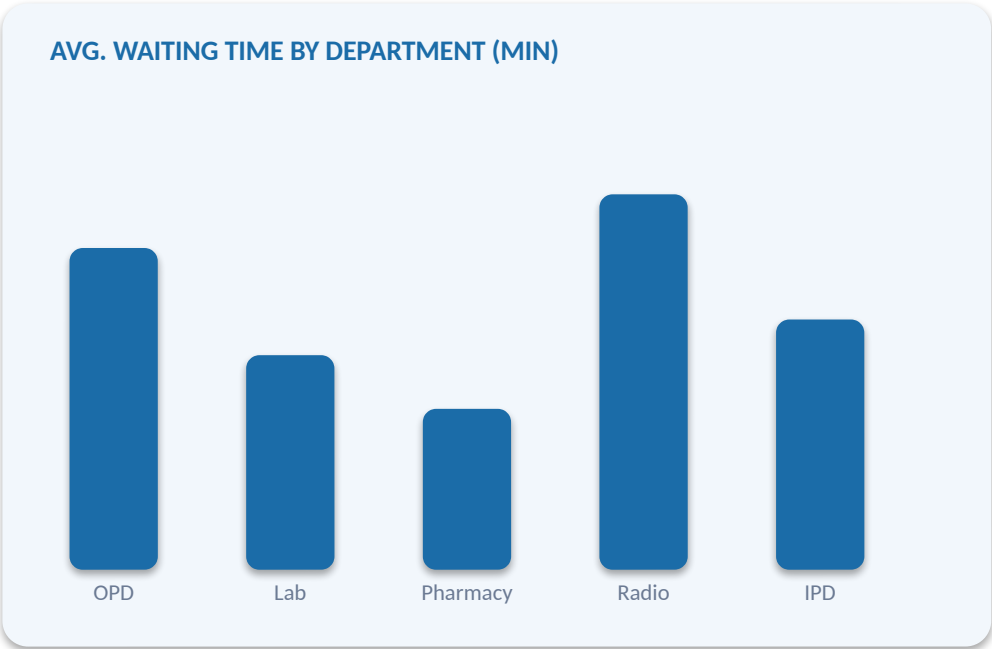

Call, Recall, Skip, Transfer, Hold, Resume, Complete, Cancel, logged instantly.

Missed Token Handling

Missed tokens are automatically flagged and can be recalled or reassigned.

Turn Queue Data Into Operational Intelligence

Qa

Queue Analytics

Live and historical view of queue length, load, and flow per counter.

Da

Department Analytics

Compare volumes and performance across every department.

Wt

Waiting Time Analytics

Track and reduce average patient waiting time hospital-wide.

St

Avg. Service Time

Understand exactly how long each consultation or service takes.

Rp

Daily & Monthly Reports

Auto-generated operational reports for management review.

Th

History & Audit Logs

Every token action is time-stamped and fully auditable.

Governed, Connected, Ready To Scale

Ra

Role-based Access

Granular permissions for reception, counters, supervisors and admins.

Mb

Multi-branch Support

Manage token operations across multiple hospital locations centrally.

Mc

Multi-counter Support

Any number of counters, departments and service points, one platform.

No

Queue Notifications

SMS / on-screen alerts keep patients informed without crowding counters.

Ap

Live Queue API

Expose real-time queue data to kiosks, apps, and third-party systems.

Hi

HIS Integration

Two-way integration with your existing Hospital Information System.

Ar

Auto Patient Registration

New HIS registrations automatically flow into the queue engine.

Td

Token Display Integration

Tokens push instantly to reception, waiting-area and counter displays.

Why Hospitals See Results Within Weeks

Business Advantages

- Lower staffing pressure at reception
- Reduced patient walkouts and complaints
- Stronger brand perception as a modern hospital

Operational Advantages

- Balanced load across doctors and counters
- Fewer manual errors in patient calling
- Faster turnaround per patient visit

Patient Experience

- No more standing in physical queues
- Clear, live visibility of wait status
- Fair, transparent, priority-aware service

Hospital Benefits

- Full audit trail for NABH & compliance
- Data-driven staffing & capacity planning
- Foundation for future digital modules

Digital CMS & Patient Display System

A complete digital signage platform that turns every screen in your hospital into a branded, informative, always-current patient touchpoint.

- Centralized content across waiting areas, OPD, IPD, OT & emergency
- Drag-and-drop playlist and display management
- Works online or offline with automatic sync
- Live queue widgets, tickers, announcements & more

One Content Hub. Every Screen, In Sync.

RESILIENT BY DESIGN

Media Library & Playlist Builder

Rich Media Library

Images, videos, PDFs, announcements and emergency messages, all in one library.

Emergency Messages

Push critical alerts instantly to every connected screen, overriding schedules.

Drag-and-Drop Playlists

Build and reorder screen playlists visually, no technical skill required.

Display Assignment

Assign playlists to individual screens or entire screen groups in seconds.

Screen Groups

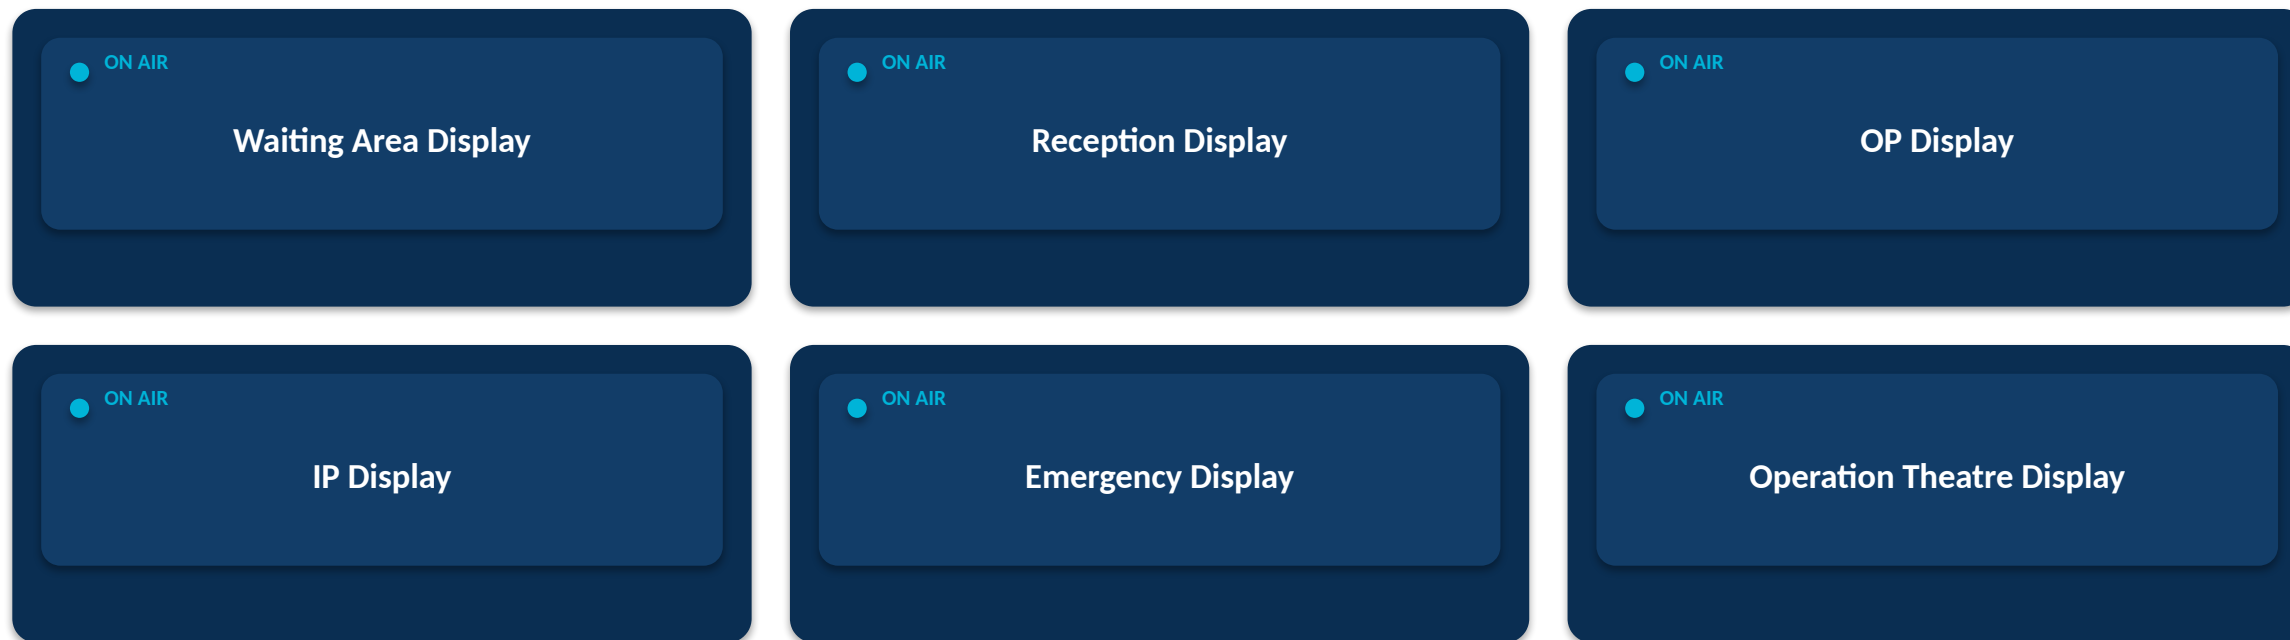

Group displays by ward, floor or branch for one-click content updates.

Asset Cleanup

Automatic housekeeping keeps your media library lean and organized.

Every Screen In The Hospital, One Network

Runs on Android TV, browser-based smart TVs, or any standard display, indoors or outdoors.

Always On. Always Current. Always Monitored.

Rp

Real-time Publishing

Push new content to every screen instantly, no manual refresh needed.

Sp

Scheduled Publishing

Plan campaigns, health drives, and announcements in advance.

Ru

Remote Updates

Update any display remotely from a single centralized console.

Of

Offline Cache

Displays keep running smoothly even during network interruptions.

As

Automatic Sync

Content re-syncs automatically the moment connectivity returns.

Hb

Heartbeat Monitoring

Every display continuously reports its live health status.

Dh

Display Health & Diagnostics

Spot faulty or offline displays before patients notice.

Eo

Emergency Override & Maintenance Mode

Instantly override all content hospital-wide for critical alerts.

Dynamic Widgets That Keep Patients Informed

Qw

Live Queue Widget

Real-time token status embedded directly into any display.

Tk

Scrolling News Ticker

A continuous ticker for announcements, alerts and hospital news.

Wx

Weather Widget

Live local weather, useful context for patients and visitors.

An

Hospital Announcements

Instant, centralized announcements across every screen.

Ht

Health Tips

Rotating preventive-care and wellness tips between appointments.

Br

Brand Promotions

Promote hospital services, packages and health camps.

Ed

Patient Education Videos

Condition-specific education content, exactly where patients wait.

Da

Doctor Availability & Events

Live doctor schedules and hospital events, always up to date.

Screens That Work For Your Hospital, Not Just On It

Patient Engagement

- Reduced perceived waiting time
- Clear, always-current information
- Better-informed, less anxious patients

Hospital Branding

- Consistent, professional look hospital-wide
- Showcase specialities & achievements
- Reinforce trust at every touchpoint

Revenue Opportunities

- Promote health packages & camps
- Cross-sell diagnostic & speciality services
- Sponsorship & partner content slots

Operational Benefits

- One console for every screen
- Instant hospital-wide emergency alerts
- Lower IT overhead & maintenance

Patient Feedback Management

A complete digital feedback journey - from QR-code capture at every touchpoint to NABH-ready analytics and reputation management.

- Drag-and-drop form builder with 10+ question types
- QR-based, department / doctor / branch-specific campaigns
- Google Review integration for positive feedback
- Deep analytics for quality & NABH accreditation

From A Scan To An Actionable Insight

AVAILABLE EVERYWHERE, ANY DEVICE

Mobile Friendly

Tablet Friendly

Anonymous or Authenticated

Multi-language Support

Ask The Right Question, The Right Way

QUESTION TYPES SUPPORTED

Star Rating	Emoji Rating
Text Feedback	Dropdown
Checkbox	Radio Button
Date Picker	File Upload
Signature	Conditional Logic

Drag-and-Drop Builder

Design multi-page feedback forms visually, no coding required.

Multi-language Support

Collect feedback in the patient's preferred language.

Conditional Questions

Show or hide questions dynamically based on prior answers.

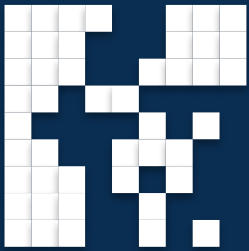

Department / Doctor / Branch Specific

Tailor questions precisely to context and location.

Capture Feedback At Every Touchpoint

SCAN & SHARE

Every QR links to a branch, doctor or department-specific feedback form.

Campaign Management

Launch and track feedback campaigns by branch, department or event.

Doctor / Department / Branch Specific

Route feedback precisely to where the experience happened.

Public Feedback Portal

A clean, mobile-friendly portal accessible without app installs.

Anonymous or Authenticated

Support both open feedback and verified patient identity.

Turn Happy Patients Into Public Advocates

Positive Feedback Path

Patients who leave a high rating are instantly and seamlessly redirected to post a public Google Review, turning satisfied patients into your strongest marketing asset.

GOOGLE REVIEW INTEGRATION

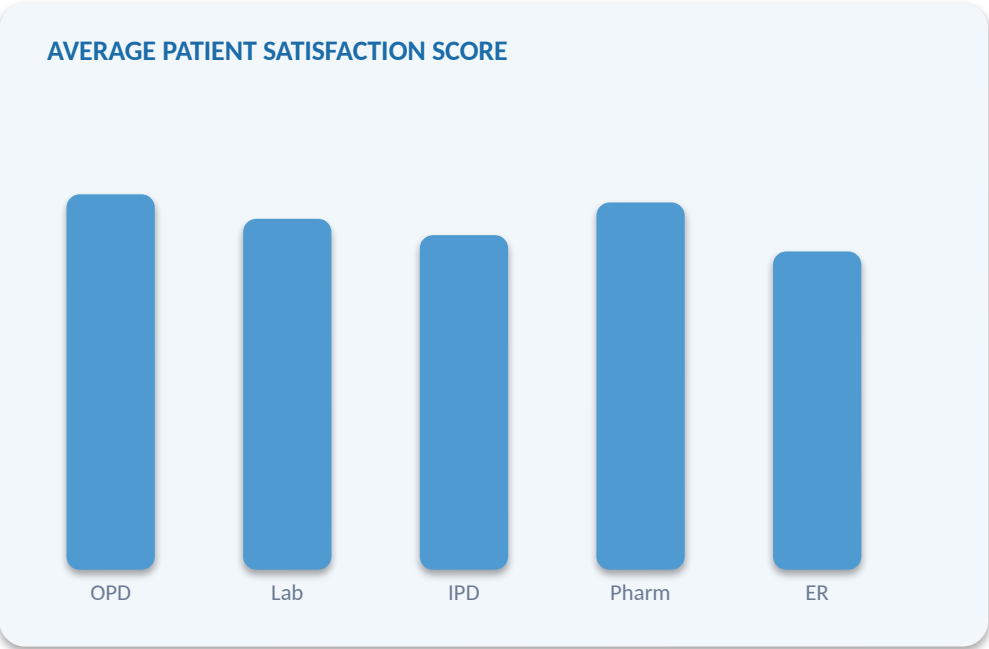

Constructive Feedback Path

Lower ratings route directly into an internal complaint workflow, ensuring every concern is tracked, assigned, and resolved before it ever reaches a public platform.

INTERNAL COMPLAINT WORKFLOW

Quality Insight At Department, Doctor & Branch Level

Dr

Department & Doctor Ratings

Granular satisfaction scores by department and individual doctor.

Br

Branch Ratings

Compare patient experience consistently across every branch.

Tr

Trend Analysis

Track satisfaction trends over time to measure improvement.

Ex

Export & Audit Logs

Export reports for management, and maintain a full audit trail.

Ra

Role-based Access

Ensure only the right people see the right feedback data.

The Patient Voice, Turned Into Measurable Quality

NABH Compliance

- Structured, auditable feedback records
- Ready-made reports for accreditation review
- Consistent quality documentation

Quality Improvement

- Early warning on service gaps
- Doctor & department-level accountability
- Data-backed corrective action

Patient Satisfaction

- Patients feel genuinely heard
- Faster resolution of concerns
- Higher trust and loyalty

Brand Reputation

- More authentic positive Google reviews
- Fewer public complaints
- Stronger digital reputation

Traditional Hospital vs. ZoeConnect-Enabled Hospital

TRADITIONAL HOSPITAL	ZoeConnect-ENABLED HOSPITAL
x Manual paper queue & shouting names	OK Digital queue with live tokens & display calling
x Paper feedback forms, rarely analyzed	OK Digital feedback captured & analyzed in real time
x Static TV playing the same loop all day	OK Smart digital signage, centrally managed & live
x Manual, delayed reports	OK Automated, real-time analytics & reports
x Manual announcements via PA system	OK Centralized CMS pushes instantly to every screen
x No visibility into patient sentiment	OK Real-time satisfaction dashboard, always on

A Platform Decision-Makers Can Stand Behind

Er

Enterprise Ready

Built to support large hospitals and multi-facility chains from day one.

Se

Secure

Role-based security, audit trails and secure authentication throughout.

Md

Modular

Adopt the modules you need now; activate more whenever you're ready.

Cr

Cloud Ready

Deploy on public or private cloud infrastructure with ease.

Op

On-Premise Ready

Or keep everything within your own data center, your choice.

Hi

Easy HIS Integration

Connects cleanly with the hospital systems you already run.

Fast To Deploy. Economical To Run.

Rs

Role-based Security

Every user sees exactly what their role requires, nothing more.

Sc

Scalable

From a single OPD counter to hundreds of displays and branches.

Fd

Fast Deployment

Structured rollout gets you live in weeks, not quarters.

Lm

Low Maintenance

Centralized management minimizes ongoing IT overhead.

Ce

Cost Effective

Modular pricing means you invest only in what you use.

Fe

Future Expansion

A clear roadmap of modules ready when your hospital is.

● TECHNICAL HIGHLIGHTS

Enterprise Architecture, Simplified

Ap

REST APIs

Open, standards-based APIs for clean integration with other systems.

Se

Secure Authentication

Modern authentication protocols protect every access point.

Ra

Role Based Access

Fine-grained permissions across users, roles and locations.

Au

Audit Trails

Every critical action is logged for compliance and traceability.

Rt

Real-time Updates

Live data propagation across dashboards, displays and devices.

Of

Offline Capability

Core functions continue working through network interruptions.

Cp

Cross-platform & Browser Based

Runs on desktops, tablets, TVs and mobile browsers alike.

Mo

Mobile Compatible

Fully responsive experiences for staff and patients on the move.

DEPLOYMENT MODELS

Diagnostic Centers

Multi-location Hospital Chains

Your Platform Keeps Growing With You

ZoeConnect is built as a modular platform. Beyond the three modules live today, the following capabilities can be activated as your hospital's digital strategy matures:

...and other future healthcare digital transformation modules, all on one connected platform.

LET'S BUILD YOUR DIGITAL HOSPITAL

Digital Healthcare Starts Here.

- Transform Patient Experience.
- Improve Operational Efficiency.
- Empower Hospital Staff.
- Build Smarter Hospitals.
